Cleopatra Slot Machine

The Cleopatra slot is a game that is created and designed by big gaming developers IGT (International Gaming Technology). The company is known for creating and distributing software for both online and land-based casinos across the globe. It is also one of the world leaders in designing and manufacturing gaming systems and casino games. This particular casino game has become so popular that a sequel was actually created, which is known as the Cleopatra II slot machine.

The game

is based on the enchanting Egyptian Queen, Cleopatra, and the game incorporates many of the Egyptian culture in its gameplay. For those who are willing to have their hands at slots will definitely want to play this fascinating and exciting video slots game,

Cleopatra.

Overview & Features

The Cleopatra Video slots game is based on the traditional slots machine that is found in regular casinos. The major difference between the regular slots and this game is that instead of three reels, the game comes with five reels. Also, the game is created in such a manner that the company has enabled a touch feature which adds to the interactivity of the players with the game. The game has 20 pay lines for players to bet and each coin that is dropped into the slots will activate a particular pay line.

The minimum bet that the player can wager is

one penny and the maximum bet can only go up to R\$10 per pay line. In fact, Cleopatra is known as one of the best online slots for low stakes players. The normal betting range is between R\$0.10 to R\$5. There is a chance for the player to win up to 10,000 credits as this is the game's maximum payout amount for every pay line that is activated.

The

gameplay is highly unique as it uses many elements from the Egyptian culture such as the music symbols and language. To add to this, a seductive voice which is interpreted to be the voice of Egypt's most beautiful queen will definitely keep players fixated on the game for many hours at a time. The combination of the popularity of Cleopatra among the public with the intense video graphics and animation of IGT has made this

particular game one that will never lose its charm in the future.

What the game does

best is that it takes a lot of imagery from the Egyptian culture and incorporates it into the regular gameplay. The symbols that are on the different reels are all various elements from the culture such as the beetle, the Sphinx and various hieroglyphics which can be associated with Egypt. The face cards on the reels, however, are represented by the same lettering which is not a drawback or a benefit to the game. It does add to the authenticity of the game by incorporating the elements of regular slots.

How to Play & Real Money Versions

As stated earlier, the game is based on

regular slots which are generally found in many land-based and online casinos. Players will have to insert coins into the game to activate the pay line. The player then has to bet on each pay line for a particular amount and the game will payout based on the combinations that are matched. There are different other features which help increase the players winnings such as the wild and scatter symbol. The Scatter symbol is represented by the famous Egyptian landmark, the Sphinx and if three or more of this symbol appears on the reels, it will activate the bonus free spin round which includes 15 free spins. There is an opportunity for the player to get up to a maximum of 180 free spins during the bonus round. A winning combination on the free spin bonus round gives the player the chance to triple his/her winnings. During regular gameplay, the scatter symbols help double the wage bet if there are two or more symbols appear on the reels.

The Wild symbol is represented by the Queen herself, Cleopatra. The wild symbol substitutes itself for another symbol except for the scatter symbol and allows the player to make a winning combination. The symbol also gives the player double the payout amount if a winning combination is made. If there is a combination of five wild symbols during the gameplay, the player will be awarded 10,000 credits and is given the opportunity to win up to 100 times the wager amount.

History of Cleopatra

Cleopatra VII Philopator, more commonly known as

Cleopatra is the last pharaoh to have ruled Egypt as she ruled over the lands for 21 years. She was one of the more significant members of the Ptolemaic dynasty, which is a family of Greek origin and is a descendant of the famous conqueror, Alexander the Great. What makes Cleopatra one of the more notable figures in history is her beauty. Historians and academic scholars believed that she was one of the most beautiful women to have ever walked the earth. Her charm was known to have control the minds of even the most strong-willed men that crossed her path which added to her long, illustrious legend.

RTP

RTP, or in other words, the return-to-players percentage, is the percentage of wagered money a slot machine will pay you back over the long term. The good news is that online slots tend to have higher RTPs than their land-based counterparts and the Cleopatra slot game is no exception, with a decent RTP of 95.02%. Bear in mind that the RTP is something that reflects what players get back over an extended period of time, so anything can happen in the short term.

Free Spins

IGT's Cleopatra has an exciting

and potentially lucrative free spins bonus. You'll trigger the bonus by landing three or more sphinx scatter symbols anywhere on the reels. Once triggered, the Cleopatra

bonus will award you 15 spins. This may not seem like a lot when compared to other online slots, but these free spins come with a few perks of their own. All your wins in this bonus will be tripled, with the exception of landing 5 Cleopatra symbols. You can even retrigger another 15 free spins should three sphinx scatters land on the reels during the round. If you're lucky, you can get a whopping total of 180 free spins in any given bonus round.

#### Paylines

The Cleopatra slot has 20 paylines across five reels.

If you want a full breakdown of what these paylines look like, you can click on the slot's paytable. In the bottom left corner of the game window, you can click on the plus (+) and minus (-) buttons to select the amount of paylines you'd like to play. The more paylines you select, the more chances you have of hitting winning combinations and getting payouts.

#### Highest Payout

One of the reasons the Cleopatra slot is so popular is because of its potential for big payouts. A combination of five Cleopatra wilds can award you 10,000x your line stake, while 4 Cleopatra symbols can award you 2000x your line stake. Keep in mind that your wins from 5 Cleopatra symbols cannot be tripled in the free spins bonus round. According to the game's paytable, the maximum win on any wager, including the wins of the bonus and the outcome which triggered the bonus, is capped at 25000000.00 credits.

#### Maximum Bet

Cleopatra offers a wide range of stakes which should appeal to a variety of players. The maximum bet for 1 line is 1000, and 20,000 for all paylines, so Cleopatra is a suitable game for high rollers. You can press the plus button (+) to increase the bet per line.

#### Minimum Bet

The minimum bet on

Cleopatra is 1.00 for 1 line, or a total of 20.00 credits for all 20 paylines. As you can see, the minimum bet is quite reasonable for a player on a budget. If you want to lower your bet per line, you can do so by pressing the minus button (-) at the bottom of the game window. The straightforward controls make it easy to maximize and minimize your bets and control your bankroll.
