Open Your Range

Because six-handed play essentially eliminates early positions, you should widen your range.

At a nine-handed table, the first three positions to act preflop – Under-the-Gun, UTG+1 and UTG+2 – are considered early position. Players should open from these positions only with premium hands (AJ suited or higher, pocket Ts or higher).

When there are only six players seated, however, chances for strong opening hands are reduced. Premium hands (A-K, A-Q, pocket Aces, Kings, Queens or Jacks,) occur only 2.1% of the time (56 combinations out of a possible 2,652). So at a 6-Max table, one of these hands will show up roughly once per eight hands dealt. If you're waiting for one of these to open, you'll be in for a long wait.

With only six players at the table, aces and middle pocket pairs are worth much more. Expanding your opening range to include pocket 6s and above, any ace down to A-7, any Broadway combination (e.g. any combination of cards T or above) and all suited aces will give you 228 total opening hands for an opening range of the top 8.6% of hands, which is still conservative in 6-Max. You can also add suited connectors and one-gappers, especially from later positions.

Why A-7?

With nine players dealt into a hand, the odds of any player having an ace are around 83%. Moreover, if you are dealt an ace in a nine-handed game, the odds another player also has an ace are around 69%. This means that for every 1,000 times you are dealt an ace, you will have the only ace 310 times on average, and there will be at least one more ace in the other 690 hands.

With an A-7

against one other player with an ace, you would have the highest kicker 41% of the time, so in those 690 hands, you would be ahead of the other player with an ace 283 times. Combine these statistics and your A-7 would be ahead 593 times in 1,000 hands against other aces or no aces (note that this analysis doesn't include pocket pairs).

With six players dealt into a hand, the odds of a player having an ace drop to 66%. If you have an ace in a six-handed game, the odds are 50% that another player does. For every 1,000 times you receive an ace, you would have the only ace 500 times. In the other 500 hands, you would have the highest kicker 205 times with your 7, meaning A-7 would be ahead 705 times out of 1,000, or 19% higher than in a nine-handed game (again, this does not include pocket pairs, only high cards).

Middle Pocket

Pairs

Middle pocket pairs (7s through 9s) also become more valuable. The odds another player has a higher pocket pair are reduced dramatically when playing six-handed. If you have pocket 7s at a nine-handed table, the odds are 24.6% that another player has a higher pocket pair. In other words, one in every four times you have pocket sevens you will be dominated by a player with a higher pocket pair.

At a six-handed table,

however, the odds another player has a higher pocket pair are reduced to 16.1% – a drop of 52.7 percent. For pocket 9s, the odds drop from 18.3% to 11.7%, or a 56.4% reduction.

Chance of another player having a higher pocket pair

Your Pocket Pair

9-Handed	6-Handed	Difference	6-6	24.7%	18.0%	52.2%	7-7	24.6%	16.1%	52.8%	8-8	21.4%	13.9%	54.0%	9-9	18.3%	11.7%	56.4%
----------	----------	------------	-----	-------	-------	-------	-----	-------	-------	-------	-----	-------	-------	-------	-----	-------	-------	-------

This analysis does not take overcards into account,

but does show that mid-range pocket pairs are more valuable pre-flop when playing six-handed.

Calling Preflop

Some players believe calling a preflop raise is a bad move, and that you should always either fold or re-raise. Fight fire with fire. They've probably not played a lot of 6-Max.

Calling preflop, especially if you have position

over the aggressor, is a solid play in 6-Max if you are playing a hand from the bottom of your range or a speculative hand like suited connectors or one-gappers. There is a good chance the player before you has opened wider than normal, so it makes sense to take a chance to see if you can connect with a flop as well, especially if the price is right.

Calling will also help you avoid some dangerous situations preflop. The propensity for some players to be overly aggressive in 6-Max could force you to make many more big preflop decisions than you would face in a nine-handed game.

While luck certainly does have a part to play in Blackjack, there is a lot of skill that goes into playing the game. How much skill or strategy you use depends on the time and effort you are willing to put into learning these skills. One such skill is card counting-not like by casinos but certainly not illegal.
