Yes, there have been a few people who have become rich solely from casino winnings. However, it is important to remember that these cases are extremely rare. The odds of winning a large sum of money at a casino are very small, and most people who gamble will lose money in the long run.

However, a few individuals are able to defeat the odds by using systematic apps and algorithms. These individuals may make a fortune on betting but even so, they rarely become millionaires through betting alone. They're also considered collectible, which can lead to higher premiums for coins that are seen as especially valuable.
